

Here's how to set up the project:

1. Open **VSCode** and open the project folder.(Keep the Hospital Management Portal Folder in desktop for easier)
2. Open Terminals:
 - Open one terminal for the backend.
 - Open another terminal for the frontend.
 - (Optional) Split the terminal view for easier use.
3. **For Backend:**

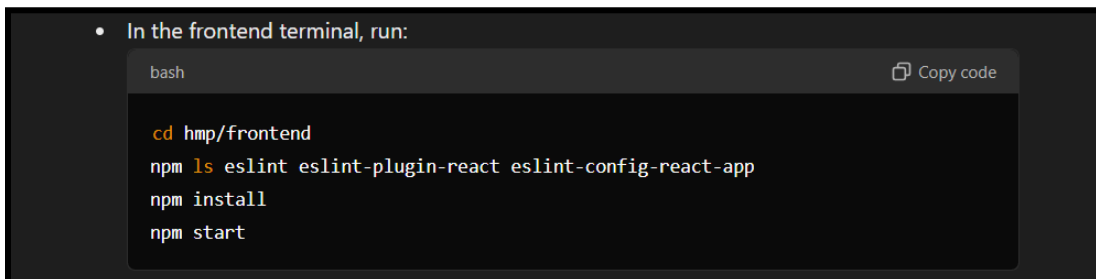

A screenshot of a terminal window with a dark background. At the top, it says "bash" and "Copy code". Below that, the following commands are listed:

```
cd hmp/backend
npm install
node index.js
```

4. For Frontend: (please follow text not image, for installation, there is a mistake)

- `cd hmp/frontend`
- `npm install`
- `npm ls eslint-plugin-react eslint-config-react-app`
- `npm start`

A screenshot of a terminal window with a dark background. At the top, it says "bash" and "Copy code". Below that, the following commands are listed:

```
cd hmp/frontend
npm ls eslint-plugin-react eslint-config-react-app
npm install
npm start
```

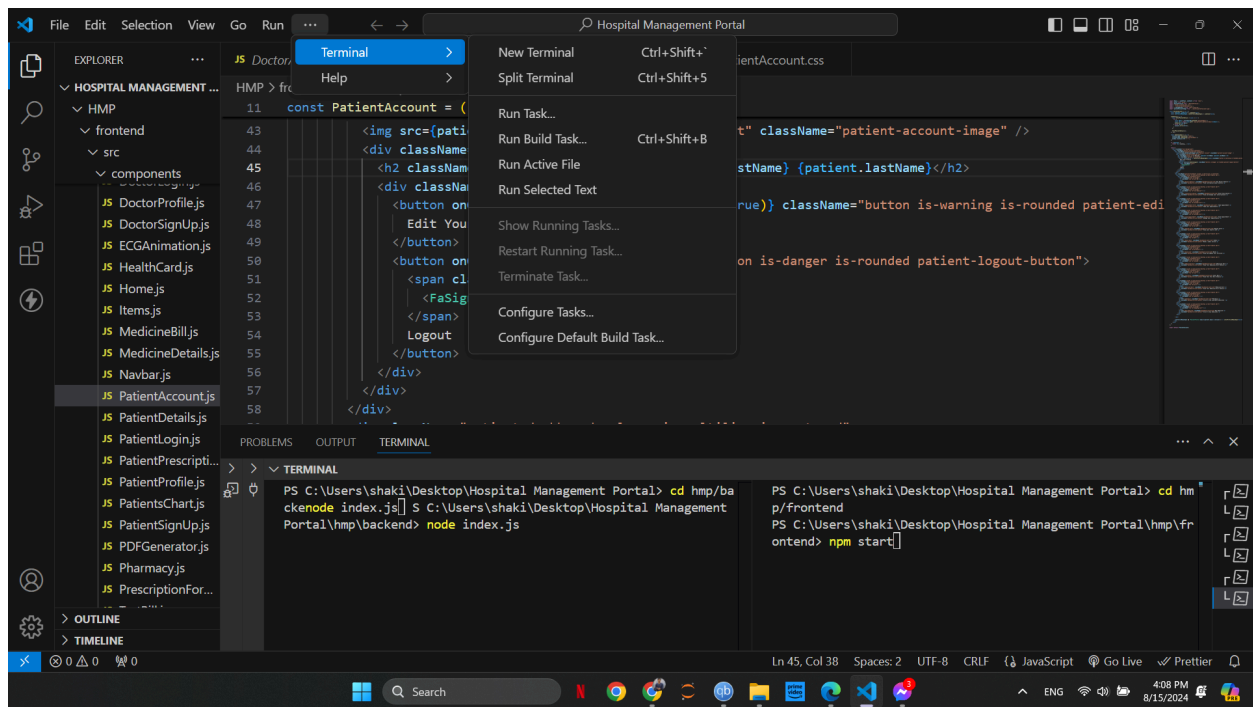

5. To run the project

To run the project:

- Backend:**

```
bash
cd hmp/backend
node index.js
```
- Frontend:**

```
bash
cd hmp/frontend
npm start
```

To exit the running command, use (CTRL+C) for exit (backend/frontend).
